Catheter and Line Securement

Safe, Simple, Secure
Safe... Grip-Lok is latex free and packaged sterile, allowing you to use Grip-Lok close to the insertion site or right in the sterile field.
Simple... Grip-Lok is applied in the same simple manner as a bandage and can be easily placed and adjusted with gloved hands.
Secure... Durably engineered, Grip-Lok holds better than tape and helps prevent dislodgement and migration, resulting in reduced risk of lost lines and patient discomfort. Using Grip-Lok for catheter stabilization conforms to the Infusion Nursing Standards of Practice¹ and can eliminate the need for sutures and unscheduled catheter restarts, thus directly reducing needlestick injuries².

Manufactured catheter stabilization devices are now listed as “preferred” in the Infusion Nursing Standards of Practice¹. Grip-Lok is a stabilization and securement device that is strong enough to lock catheters, tubes and lines securely in place, yet versatile enough for almost any securement situation.

¹Infusion Nursing Standards of Practice, February 2006, Infusion Nurses Society
²OSHA Fact Sheet: Securing Medical Catheters
Universal Peripheral IV and Arterial Catheter Securement

Grip-Lok 3300MIV for winged and 3300MART for non-winged applications secure the catheter and Luer hub from the top, bottom and sides. The unique wrap-around design provides securement that maintains optimal catheter insertion angle and provides protection for the skin from hard plastic parts.

Overall length: 3.5” (8.9cm)
Patent Pending

* Not available in Canada and the EU

3300MIV and 3300MART will secure ported catheters.

3300MIV and 3300MART will secure needleless connectors.

By securing both the catheter and Luer connector, the 3300MIV and 3300MART maintain insertion angle.
Arterial Catheter Securement

**Arterial Catheter**

Grip-Lok for femoral and radial arterial catheters provide strong securement for introducer sheaths during cardiac catheterization procedures allowing clinicians to use both hands for more efficient manipulation of guide wires.

Overall length: 3.5” (8.9cm)

Foley Catheter

Grip-Lok Large Foley Catheter Securement is designed to hold the catheter in a channel created by a foam insert and a fabric loop over-strap. Grip-Lok for Foley Catheter does not utilize adhesive to secure the catheter in place allowing for freedom of movement and patient comfort. The degree of rotational and horizontal movement can be adjusted using the top fabric over-strap.

Designed for tubes sized 12 - 30 French in diameter.
Overall length: 6.25” (15.9cm)
Patent # D616,983

Medium
Grip-Lok Medium universal stabilization device is versatile enough for almost any securement situation and is strong enough to securely hold lines and tubes 3 to 8mm in diameter.
Designed for tubes sized 1/8” - 5/16” (3.0 - 8.0mm) in diameter.
Overall length: 3.5” (8.9cm)

Applications:
- IV Lines
- Surgical Drains
- Catheter tubes
- Bedside Monitoring Equipment
- Any tube, line or catheter sized between 3 and 8mm in diameter that needs to be secured.

Strong enough to lock catheters, tubes and lines securely in place, yet versatile enough for almost any securement situation.
**Large**

Grip-Lok Large is a universal large line and catheter stabilization device that will hold tubes 6 to 13mm in diameter securely in place. Grip-Lok Large can provide firm securement for chest tubes and provides comfortable securement of wide range of latex Foley catheter sizes.

Designed for tubes sized 1/4” - 1/2” (6.0 - 13.0mm) in diameter.
Overall length: 6.25” (15.9cm)

**Applications:**
- Chest Tubes
- Foley Catheters
- Any tube, line or catheter sized between 6 and 13mm in diameter that needs to be secured.

**Small**

Grip-Lok Small universal stabilization device is strong enough to lock lines and tubes 1.5 to 4.5mm in diameter. Grip-Lok Small can be used in a wide variety of applications that require a smaller footprint area such as on infants or children.

Designed for tubes sized 1/16” - 3/16” (1.5 - 4.5mm) in diameter.
Overall length: 3” (7.6cm)

**Applications:**
- Feeding Tubes
- IV Lines
- Bedside Monitoring Equipment
- Any tube, line or catheter sized between 1.5 and 4.5mm in diameter that needs to be secured.

Medium Wide Adhesive

Grip-Lok Medium Wide Adhesive will adhere and secure catheters made from silicone, PVC and other plastic compounds. The versatility of Grip-Lok Medium Wide Adhesive will secure larger tubes in addition to a wide variety of hub sizes and shapes.

Overall length: 3.5” (8.9cm)
Patent # D608,887
Grip-Lok CS Catheter Specific PICC Securement

The Grip-Lok CS series provides a foam die-cut insert that matches the shape of the catheter hub for proper positioning and additional securement stability.

**Medcomp® Pro-PICC®**

**Bard™ PowerPICC™**

**Navilyst® Xcela® PICC**

**AngioDynamics® Morpheus® PICC**

Designed for both single and multi-lumen catheter for the brands specified. Overall length: 3.5” (8.9cm)

**Universal CVC Securement**

Grip-Lok 3601CVC for PICC and CVC securement provides an adhesive area that will stick to a wide range of hubs and delivers superior protection from accidental line pulls.

Overall length: 3.5” (8.9cm)
Patent Pending

*The 3601CVC can secure on the chest or neck and is designed to provide stable suture-free securement at the catheter attachment points.*
**Arrow® CVC**

Grip-Lok for Arrow CVC will secure subclavian access at the hub and will also fit alternative catheter attachment points.

Designed for Arrow-Howes CVC hubs. Arrow is a trademark of Teleflex Incorporated.
