

Finger Guard™

Clear Protective Finger Cover
Powder Free • Latex Free

Protection at Your Finger Tips

Eliminate Cross Contamination between Pulse Oximeter Probe and Patient:

In most cases, the patient's hands and/or probes are not disinfected prior to probe oximeter measurements.

- Protection for patient and pulse oximeter probe.
- Provides accurate pulse oximeter measurements.
- A necessary and vital tool in the fight against nosocomial infection.

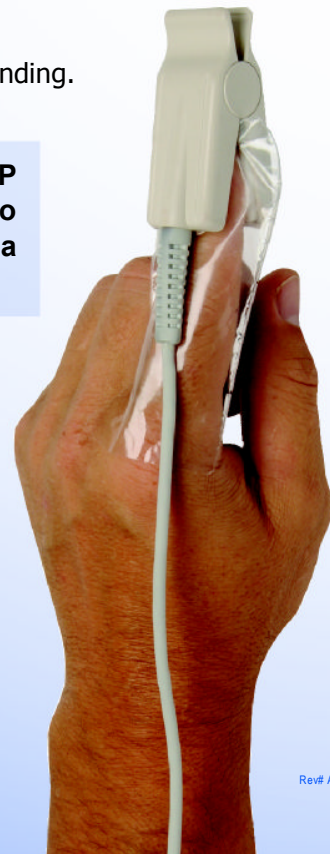

Features and Benefits of Finger Guard™:

- Eliminates need for costly, single use disposable probes.
- Offers a cost-effective solution to nosocomial infection.
- Clear protective finger cover.
- Powder free, latex free.
- Easy application, easy to dispense.
- Convenient, non-absorbent dispenser box – Simply wipe off to clean.
- Universal application – ICU to EMS.

Product Information:

- 100 Finger Guards per box, 10 boxes per case.
- Reorder Number 023-30-1101
- FDA 510K approved
- Patents: 6179159; 6553242; patents pending.

Effective October 1, 2008, Rule-1 553-P eliminates financial reimbursement to healthcare providers in the event of a nosocomial infection incidence.
