

# Sapphire Suction Reservoir

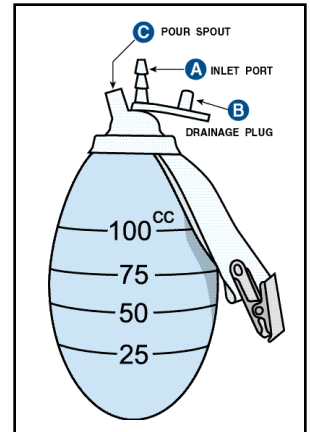

Greer Medical, Inc. Receives Trademark on Sapphire Suction Reservoir™ — The newest in its line of surgical and post-surgical devices

**Santa Barbara, CA**— Greer Medical, Inc. has been awarded a trademark for its Sapphire SUCTION RESERVOIR™ by the U.S. Patent and Trademark Office. This product complements Greer Medical's current SeromaCath® Wound Drainage System.

Developed by Greer Medical, Inc., the Sapphire Suction Reservoir™ has a wide variety of applications in post-operative drainage procedures where continuous drainage against gravity is necessary. Closed system drainage reduces the possibility of fluid contamination and allows for easy visual examination of the contents by patient and physician.

The Sapphire Suction Reservoir™ has been designed to provide better suction capabilities than other suction bulbs on the market and it incorporates an anti-reflux valve to help prevent reflux of fluid. The Sapphire is designed with markers at 25, 50, 75 and 100cc to allow measurement of the fluid in the reservoir. Unlike other suction bulbs, Greer's Sapphire Suction Reservoir™ has a strap with a stainless steel clip, which allows it to be attached conveniently and discreetly to the patient's gown or clothing.

For further information on the Sapphire Suction Reservoir™ visit [www.greermedical.com](http://www.greermedical.com) or contact Greer Medical, Inc. at 1-800-424-2155.

Markers at 25, 50, 75 and 100cc allow measurement of fluid in the reservoir.

The Sapphire Suction Reservoir™ is recommended for single use only and should not be re-sterilized.

## About Greer Medical, Inc.

Greer Medical, Inc. was founded in 1991 by Dr. Albert Medwid, a surgical oncologist, who invented and patented the SurgiFish® Viscera Retainer and the SeromaCath® Wound Drainage System. Greer Medical provides medical devices worldwide.

Greer Medical, Inc. is dedicated to improving the quality of life of the surgical patients whom we serve by delivering to the surgeons who treat them safe, innovative, cost-effective, and clinically-proven medical devices for wound drainage and general surgery applications.

Greer Medical, Inc. will continue to meet surgeons' expectations and conform to all international regulatory and quality standards including the United States Food and Drug Administration Good Manufacturing Practices Quality System Regulation, the European Device Directive, ISO 9000 and EN 4600 family of standards.

Greer Medical, Inc. will meet these goals through innovation, the dedication of combined team effort and organizational excellence.
