

Meet the tCOM+

Developed with care, designed for confidence.

The tCOM+ offers continuous monitoring of tcPCO₂, SpO₂, and PR with a sleek new look and feel. This latest model includes significant software advances that improve workflow for providers, while continuing to support reduced blood draws and proactive ventilator management across care areas.

- Easily access frequently-used features and workflows by saving your team's favorites.
- Track patient progress with real-time event logging of vent changes, test results, medication administration, and more.
- Quickly navigate the intuitive, high-resolution touchscreen display.

ACCURATE

Continuous, noninvasive CO₂ values tightly correlate with PaCO₂ regardless of ventilation strategy or degree of V/Q mismatch.

EASY

Long site times, a range of attachment solutions, and sensor features like Smart Cal-Mem mean smoother monitoring experiences at the bedside.

SAFE

Low temperatures and design features promoting skin integrity support safe monitoring in even the smallest, most fragile patients.

TRUSTED

Recommended in a variety of clinical practice guidelines by respected organizations all over the world.

Monitoring that does **more**

More **efficiency**

- Resolve issues quickly with helpful alerts and on-screen tutorials.
- Proactively manage and maintain equipment with dedicated sensor information screens.
- Keep bedside and equipment areas organized with integrated cable management.
- Smart Cal-Mem feature allows temporary disconnection for bathroom breaks, repositioning, and other workflows.

More **flexibility**

- Carry the lightweight tCOM+ by its fold-flat handle or choose a mounting solution that fits your team's needs.
- Connect with patient monitoring systems (PMS), patient data management systems (PDMS), and polysomnographic systems (PG/PSG).
- Compatible with the V-Sign™ sensor.

More **options**

MULTI-SITE ATTACHMENT RING

For mature, intact skin

MULTI-SITE ATTACHMENT RING

For sensitive, fragile skin

NON-ADHESIVE WRAP

For gentle attachment in VLBW infants, especially in high-humidity environments

STAYSITE™ ADHESIVE

For even more secure adhesion in sweaty or mobile patients

EAR CLIP

For unobtrusive attachment in older children and adults

SINGLE-DOSE CONTACT GEL

For convenient workflow & infection control
