## The New Boppy® Healthcare Nursing Pillow

The New Boppy® Healthcare Nursing pillow has a firmer, higher loft and wider opening than our original nursing pillow while maintaining the hospital-grade materials and quality construction you have come to expect from Boppy. The New Boppy® Healthcare Nursing Pillow is designed for ergonomic positioning while breastfeeding, leading to positive patient outcomes\*\*. This multi-patient, wipeable nursing pillow reduces time spent propping moms with bed pillows, freeing up more time for direct patient care

### Why the change?

Federal regulations and consumer feedback led Boppy to develop this new nursing pillow design. The firmer, taller cushion brings baby even closer for better latching, while the wider opening accommodates more body types and can be easily maneuvered for different feeding positions. This version of the New Boppy® Nursing Pillow is specifically designed for the healthcare space and Boppy nursing pillows have been shown to cut down on nurses' time to prop breastfeeding moms compared to bed pillows.†

### Impermeable Fabric

Passes ASTM tests for liquid and blood permeability and prevents strike-through.

### Sanitary

The healthcare nursing pillow is made of wipeable fabric that helps maintain cleanliness

### Safe for Patients

100% polyester, PFAS-free, latex-free and the pillow is filled with polyester fiber. Meets all flammability standards without the addition of flame-retardant chemicals

### Comfortable

Puts patient in an ergonomically correct position when breastfeeding or bottle-feeding baby

For use with the New Boppy® Disposable Slipcovers  
Sold separately in the green carton.

\*Based on prior calendar year nursing pillow market data.

\*\*December 2024 Boppy Patient Survey.
